JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Report from Nagasaki—Examination of emigrants—Sanitary conditions.

Acting Sanitary Inspector Thompson reports:

April 17. One emigrant recommended for rejection; cause of rejection, trachoma.

April 24. No quarantinable disease present.

MEXICO.

Report from Coatzacoalcas—Inspection of vessels.

Acting Assistant Surgeon Thompson reports, May 20:

Week ended May 19. Inspected 4 steamships preliminary to issuing bills of health.

The health of the port is satisfactory.

Report from Mexico City—Case of yellow fever at Tekax, Yucatan.

The following is received from the superior board of health of Mexico, under date of May 24:

A case of yellow fever occurred May 16 at Tekax, 106 kilometers from Merida. The prophylactic measures previously reported have been applied.

Report from Progreso—Inspection and fumigation of vessels—Sanitary measures enforced—Inspection of outgoing passengers—Yellow fever in Yucatan during April, 1909—Yellow fever case, imported.

Acting Assistant Surgeon Harrison reports, May 15:

Period from May 7 to 15.

Bills of health issued.....	6
Vessels fumigated.....	3
Members of crews.....	283
Passengers from this port.....	38

The sanitary conditions were fair throughout the country and no quarantinable disease was reported.

Sanitary measures appear to be well enforced. All vessels arriving at this port are inspected and all suspicious cases, if there are any on board, removed to the lazaretto and the ship is subjected to disinfection, if necessary, before passengers are allowed to land or the cargo to be discharged. All outgoing passengers are examined by the Mexican medical officer before going on board. All persons on trains are subject to inspection en route. A memorandum of their destination and of their intended place and length of sojourn is kept. They are subject to constant observation while in the State if strangers or transients, and all persons not known to be immune are isolated when affected with any suspicious disease. The city of Merida is divided in 4 or 5 districts, to each of which are assigned a medical inspector and several assistants, who make frequent visits to residences in their respective districts, keep note of immune and nonimmune occupants, of the entry and departure of nonimmunes, and of all matters of sanitary interest; isolate suspects, petrolize or
